Read the market. Trade your way.

Market intelligence, wallet-approved Spot and guarded Autopilot. One connected workspace.

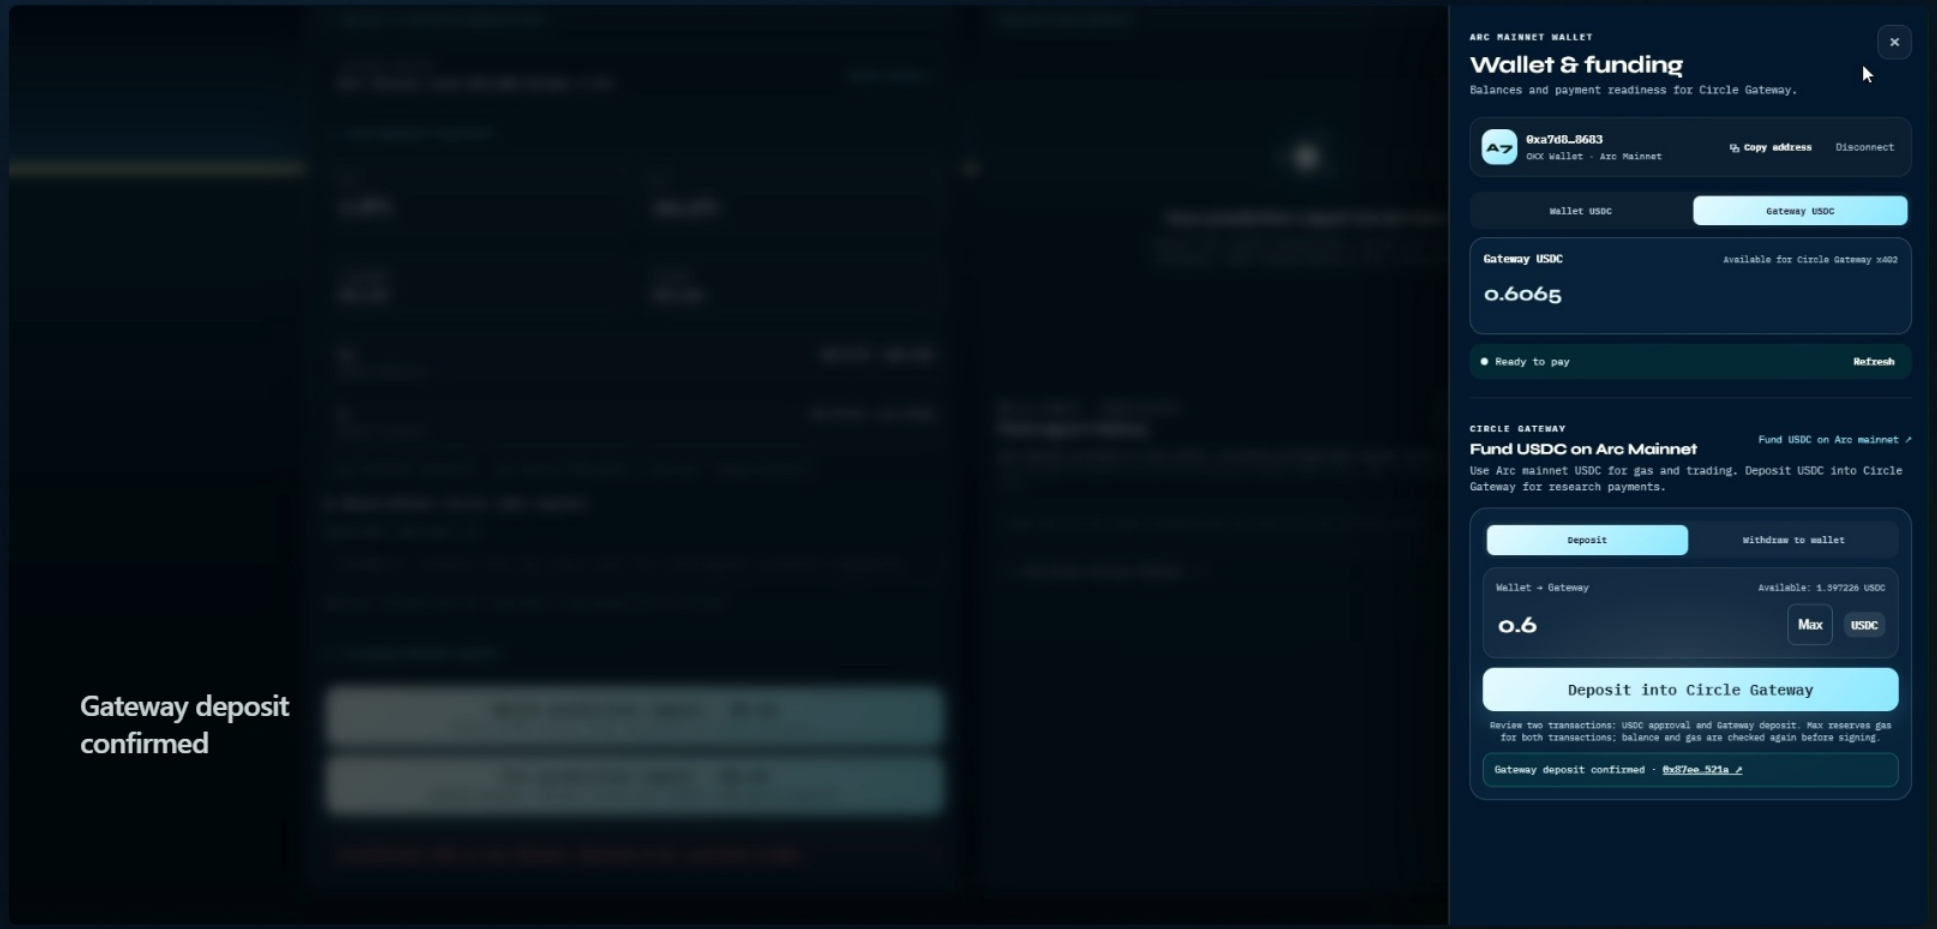

See the whole picture.

Wallet ≠ Gateway

Follow your balances, orders and strategy activity. Wallet and Gateway funds stay distinct.

One deposit. Ready for research.

Deposit USDC into Circle Gateway, review the wallet steps, then check the confirmed balance.

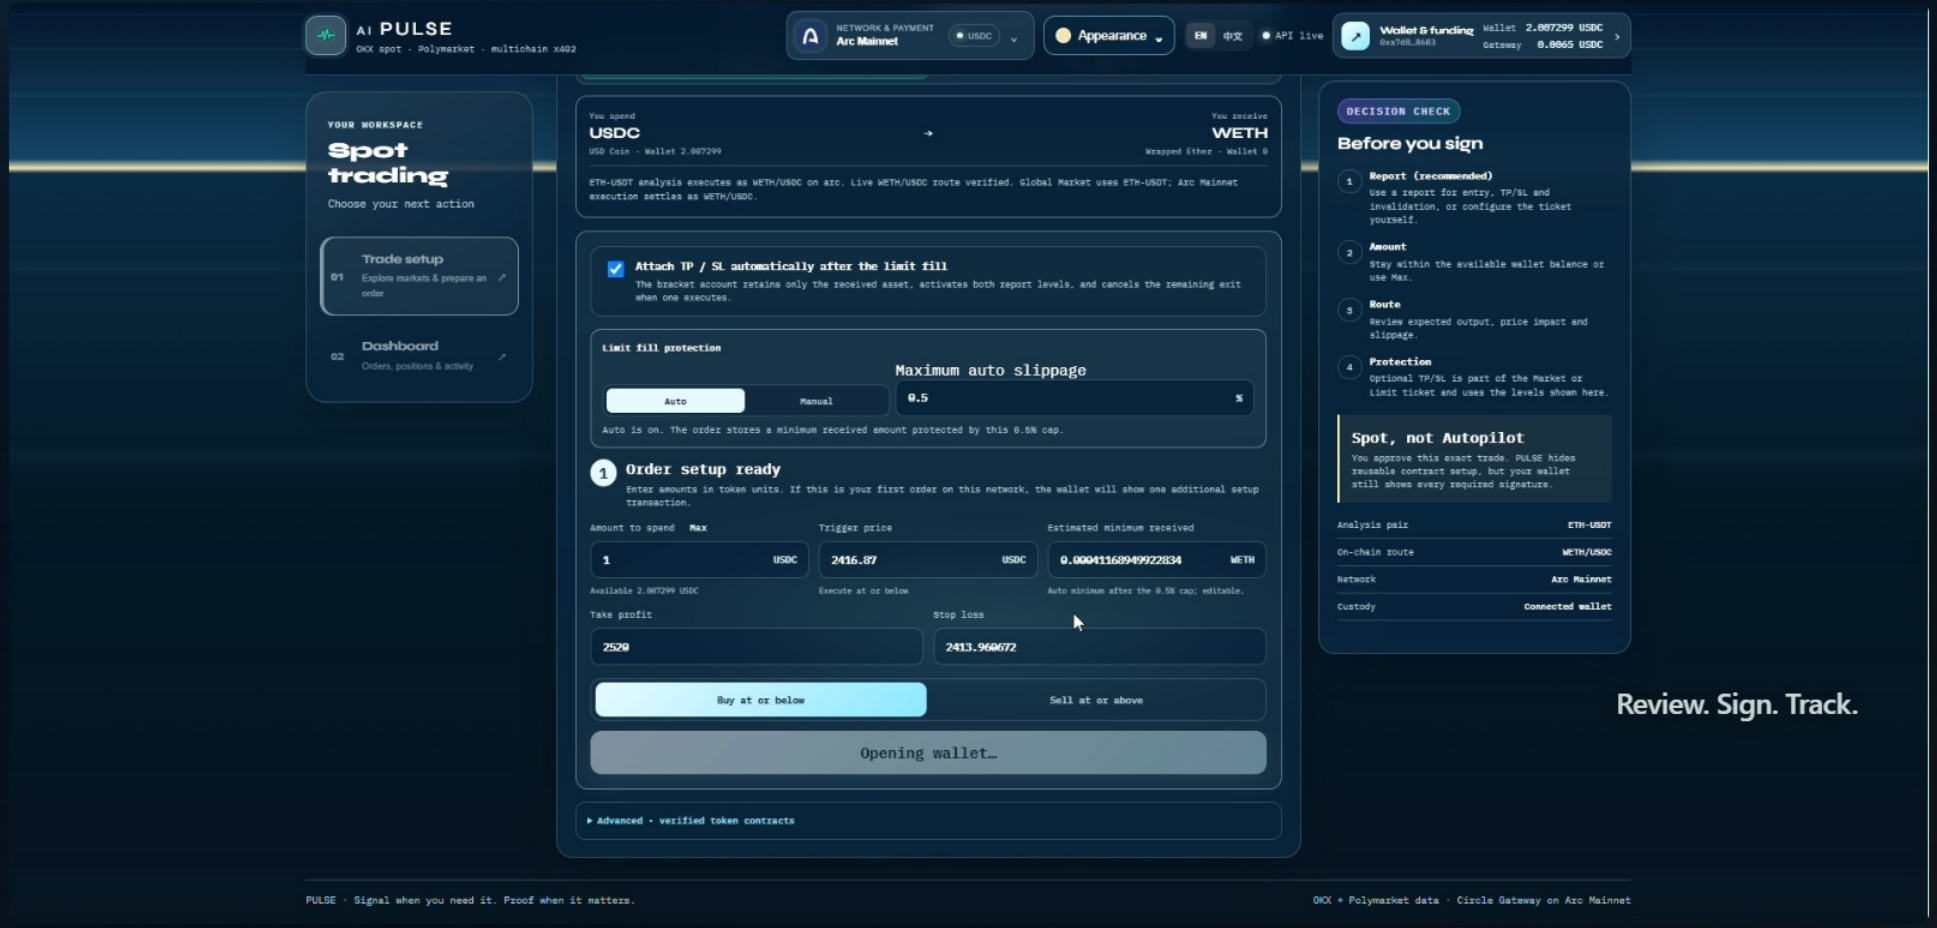

Turn market data into a plan.

Context. Targets. Invalidation.

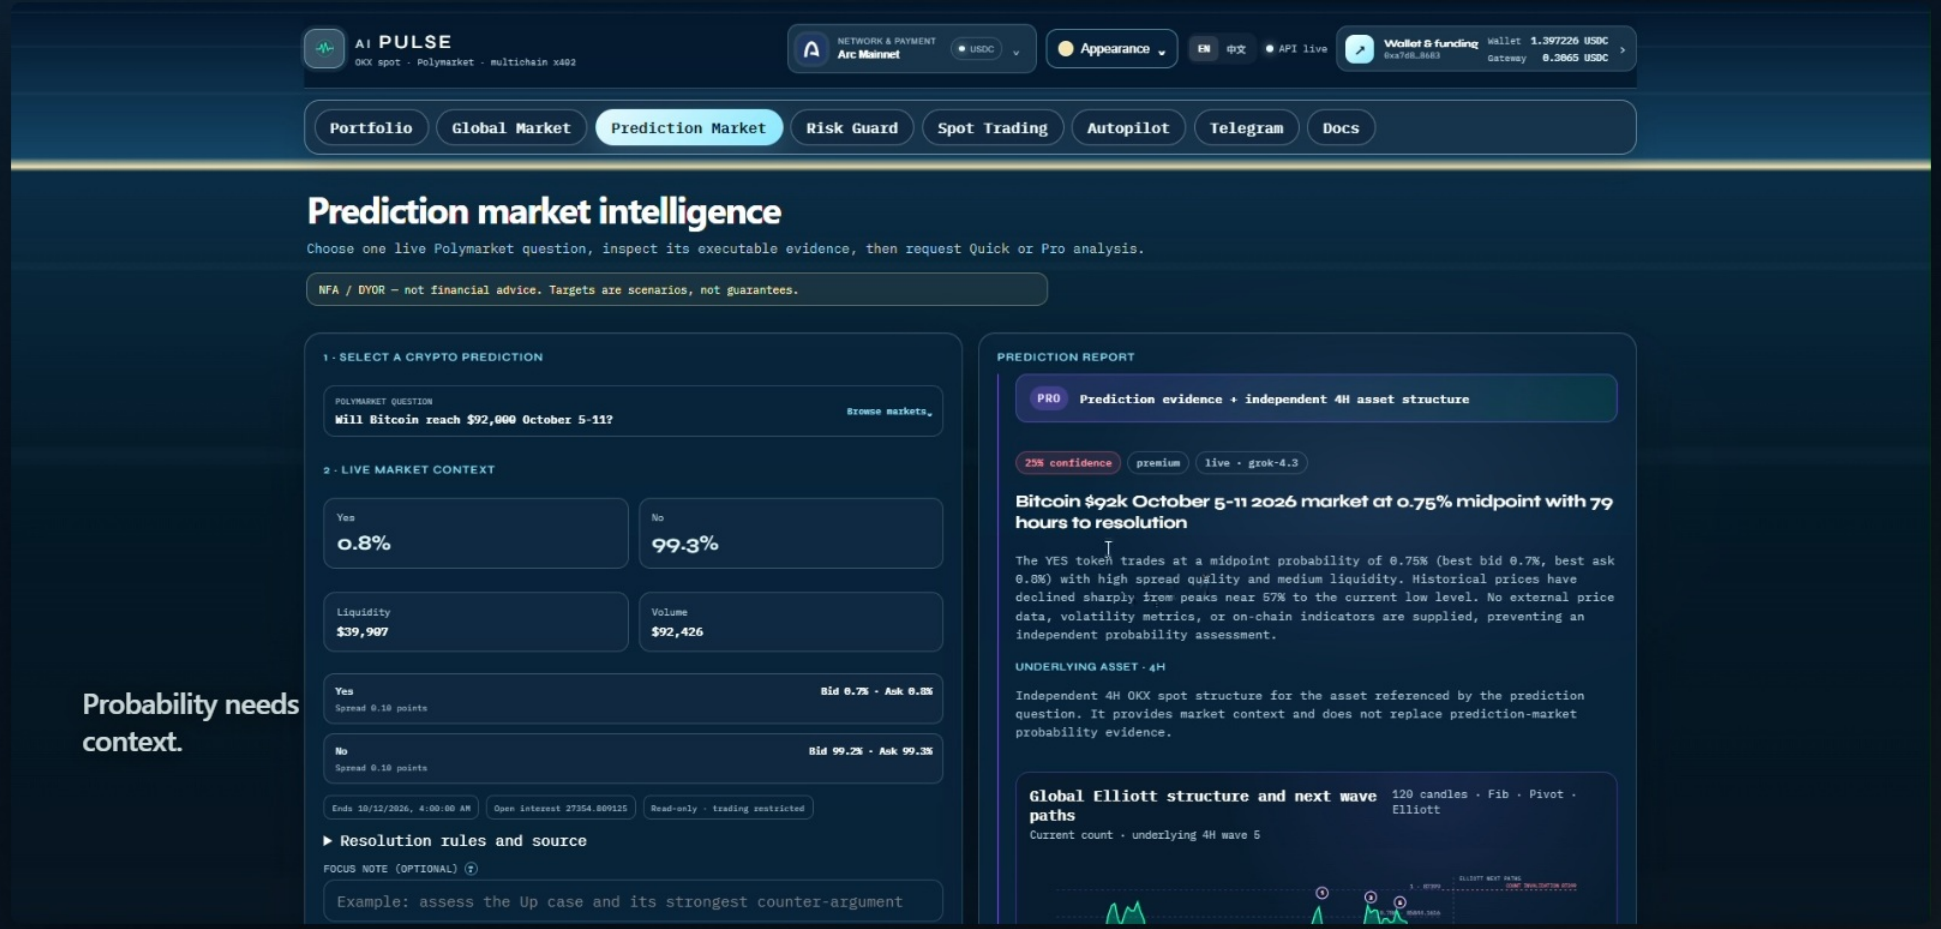

Explore live OKX data, inspect the report and compare scenarios before opening a Spot ticket.

From research to your order.

On Arc, ETH research maps to WETH/USDC. Review the trigger and protection; follow the order state.

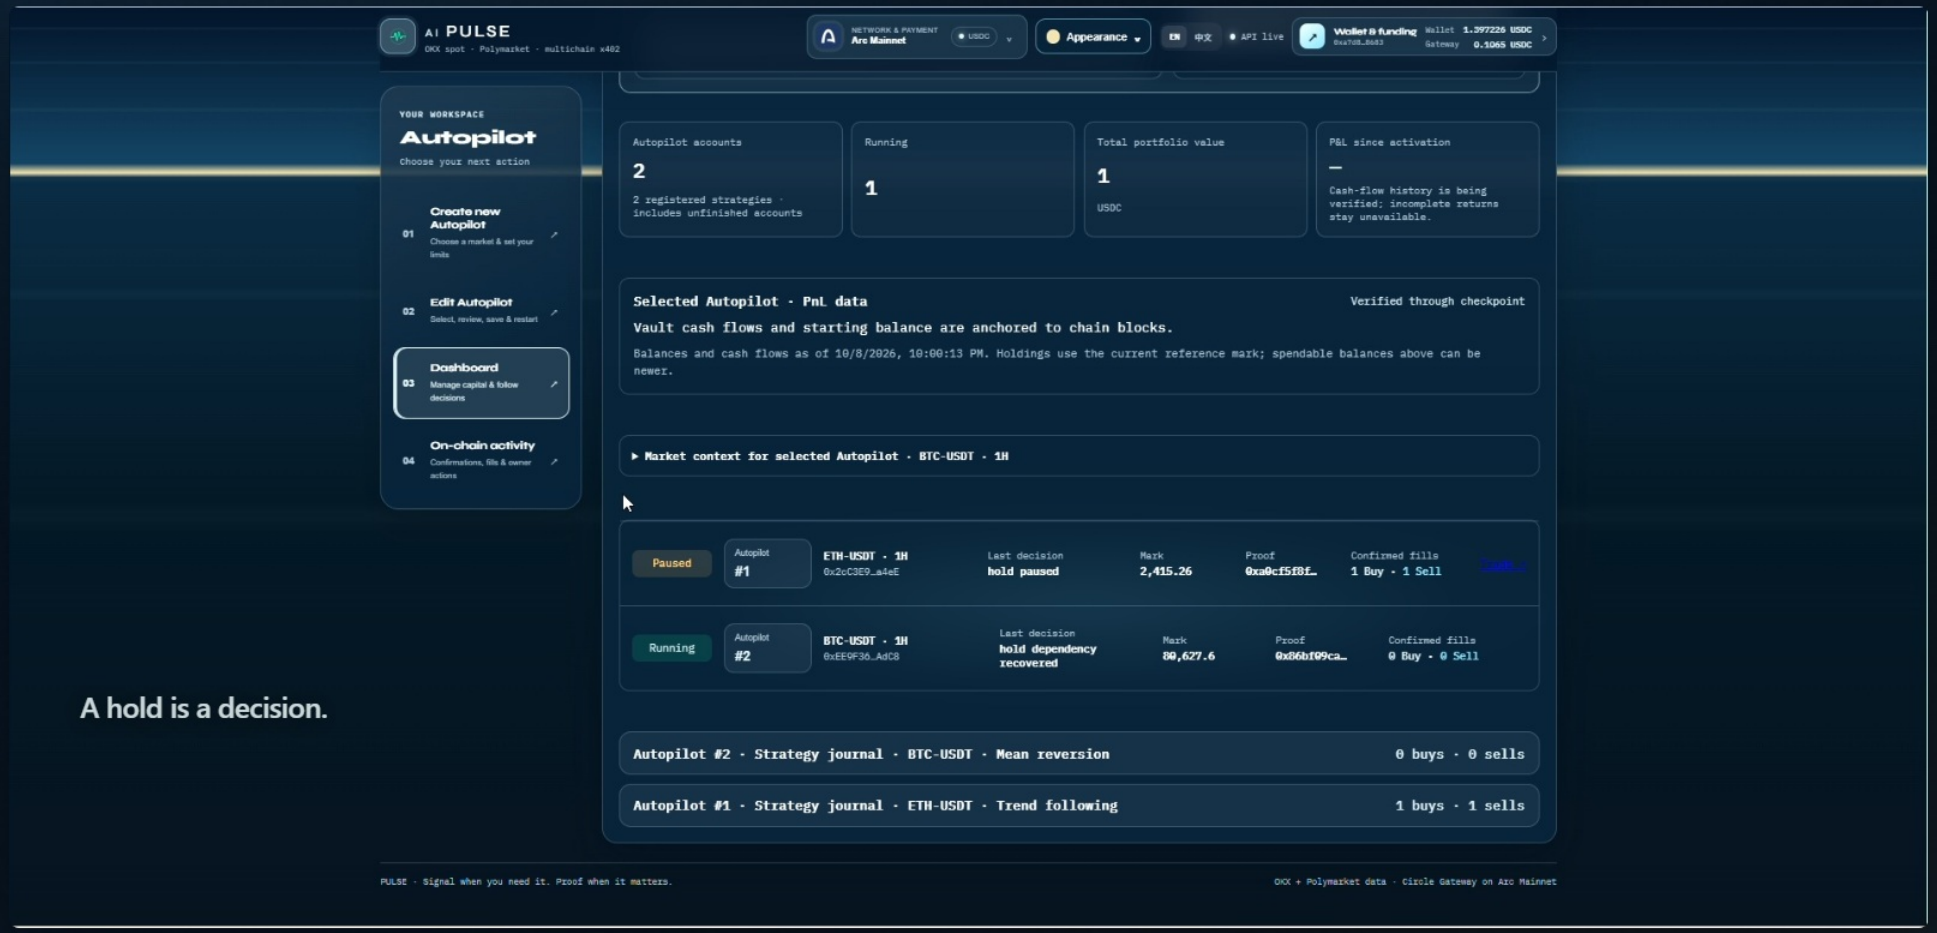

See the evidence behind the odds.

Probability needs context.

Inspect a live question, its rules and probabilities. Research adds evidence and alternative scenarios.

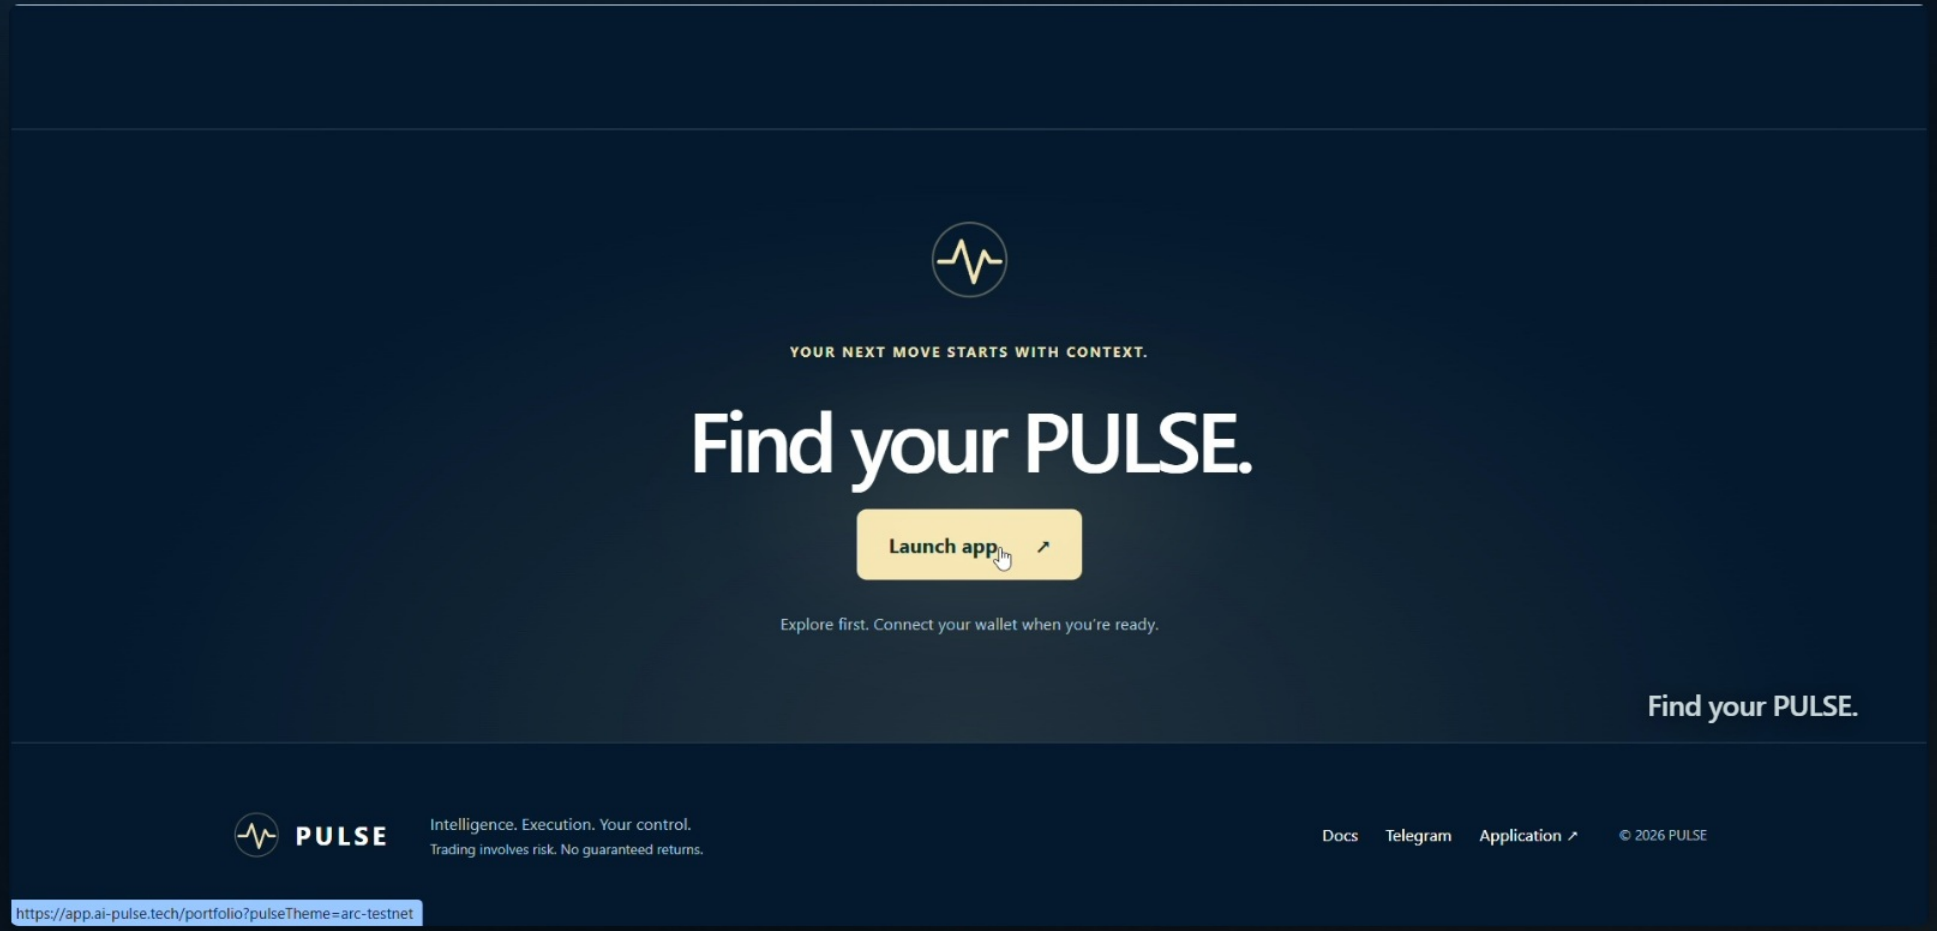

Your strategy. Your boundaries.

A hold is a decision.

Choose the strategy, review your limits and follow the vault. Every hold and action stays visible.

Signal when you need it. Proof when it matters.
